

LPU Sample Syllabus: Artificial Intelligence (INT246)

Unit 1: Introduction to AI

What is AI, Turing Test, History of AI, Intelligent Agents, Environments.

Unit 2: Problem Solving and Search

State space search, Uninformed search (BFS, DFS), Informed search (A*, Heuristics).

Unit 3: Knowledge Representation

Propositional Logic, First-Order Logic, Forward and Backward Chaining, Resolution.

Unit 4: Machine Learning Basics

Supervised learning, Unsupervised learning, Decision Trees, Neural Networks basics.

Unit 5: Natural Language Processing

Syntax, Semantics, Parsing, Applications of NLP.
